COMPANY OVERVIEW

Insight Technologies is a veteran-owned and operated security integrator based in Lafayette, LA, serving South Louisiana since 2012. We specialize in network-based physical security — video surveillance (CCTV), electronic access control, and business networking — for commercial, government, church, and school clients throughout Acadiana and South Louisiana. We have installed and maintain thousands of security cameras and hundreds of access-controlled doors, and we back every deployment with rapid local support.

CORE CAPABILITIES

Security Camera Deployments (CCTV / Video Surveillance)

- Site assessment, camera placement design, and coverage planning
- IP and analog camera installation, cabling, and mounting
- NVR/DVR configuration, storage sizing, and cloud video hosting
- Remote monitoring, mobile app integration, and analytics (motion, license plate, facial recognition)
- System integration with access control and alarm platforms

Electronic Access Control

- Card, fob, keypad, and biometric access system design and install
- Door hardware: electric strikes, maglocks, request-to-exit devices
- Multi-site and multi-door credentialing and user management
- Visitor management and integration with badge/ID systems
- Cloud-based and on-premise access control platforms

Networking & IT Services

- Structured cabling (Cat5e/Cat6/fiber) design and installation
- Network design, switching, routing, and Wi-Fi deployment
- Firewall, VLAN segmentation, and network security hardening
- Server, workstation, and cloud infrastructure support
- Managed IT services and ongoing maintenance contracts
- Low-voltage systems: intercoms, alarms, and paging

PAST PERFORMANCE

Private K-12 Schools – Mid-to-large camera deployments (50–500+ cameras) covering classrooms, hallways, entrances, and parking lots, with integrated keycard/fob/biometric access control; projects ranging $10,000–$100,000+.

Churches – Scalable deployments including 100+ camera systems covering sanctuaries, campuses, and parking areas.

Oil & Gas – Installed and continue to manage plant-wide CCTV and electronic access control systems for energy-sector facilities.

Local Government – Designed and deployed security systems for parish fire districts, municipal governments, and critical infrastructure projects.

DIFFERENTIATORS

- Veteran-owned and operated
- Over a decade of security & access control experience (est. 2012)
- Thousands of cameras and hundreds of doors installed and maintained
- Local, rapid-response support based in Lafayette, LA
- Single-vendor integration: cameras, access control, and networking
